

About me

I was born in Germany where I also lived my first childhood years.

From my early I followed my instinct and at the age of 12 I dealt with advertising.

In my first professional steps in Greece I was involved in a lot of and different sectors as assistant of production, model, barman, skipper but my spirit always prompted me to achieve my children's dream and to become an actor.

At the age of 20 I moved to America where I studied direction and hypocritical art in the university of Los Angeles placing the bases for the concretization of my objectives. When I returned in Greece I had the chance to collaborate with important directors in the field of television which entrusted me with important roles. At the same time, I participated in important productions of films in Greece and abroad that gave me the possibility of making my first steps with success in the international fixation.

My objective is to serve my art and my profession with all of my soul, drawing this force for each new challenge that is presented.
